

# HEALTHAPP AUTOMATION

## OPERATION THEATRE MODULE-

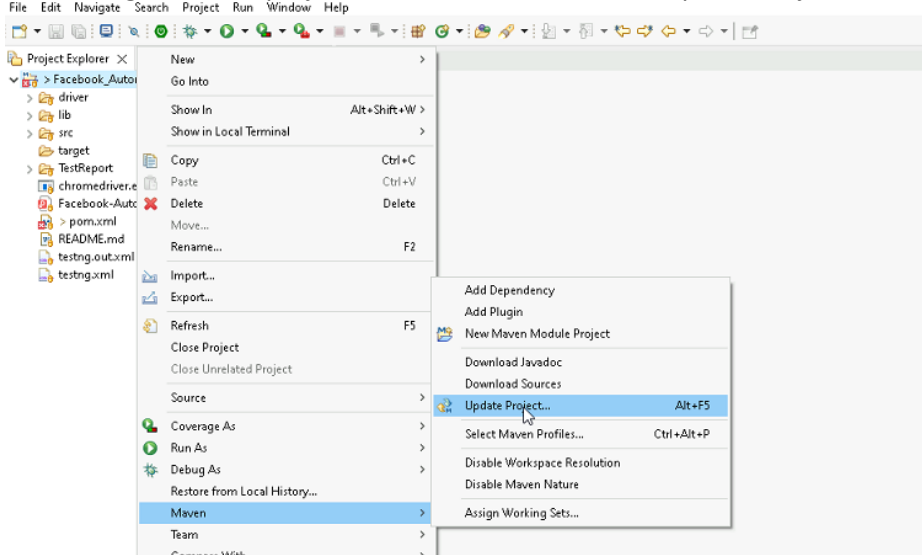

### PL1

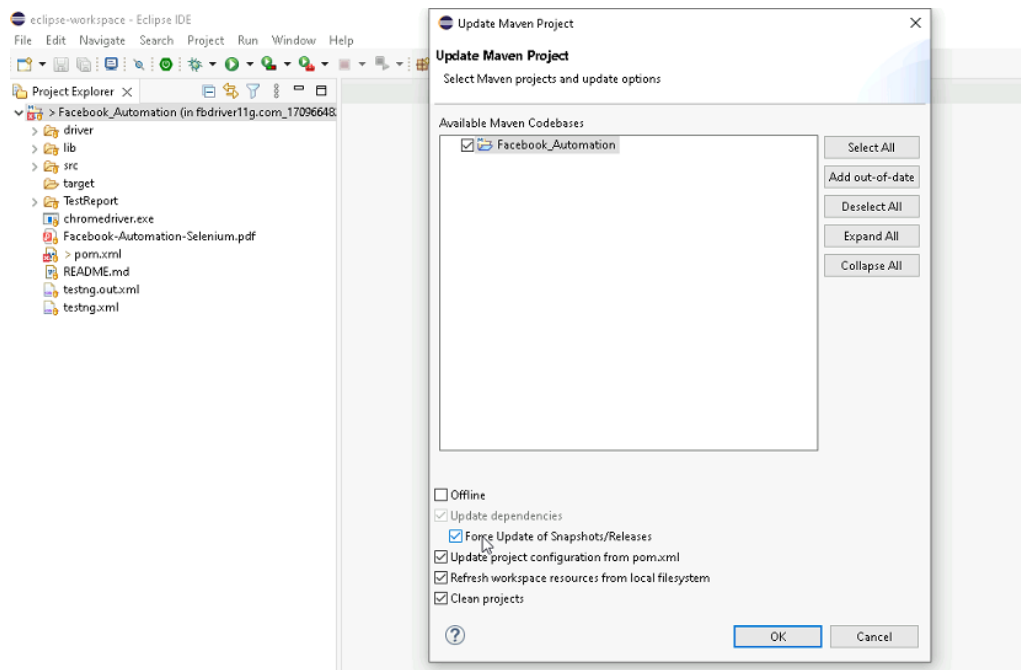

## Pre-requisite:

As soon as you import project in eclipse, update the project using maven update option as below. This is to resolve issue if any maven dependency not downloaded properly:

### 1. Right click on project : Go to “Maven” : Select “Update Project”

### 2. In Update Maven Project Box Select “Force Update of Snapshots/Releases” and click OK

### Template Code Structure:

- a. Below are the packages and files you will be required to work upon.
- b. Other Files and packages you can ignore.
- c. In other Files and packages do not do any changes. It would affect your evaluation.
- d. You are not required to work in "Test" Folder. Files there are non-editable. Editing those files and trying to save them will throw error and would affect your evaluation.

Package	Class/File	Description
/src/main/java/pages	operationTheatre_Pages.java	<ol style="list-style-type: none"><li>1. All core activities (mentioned in list above) to be performed here.</li><li>2. The comments associated with each templated method here describe the expectation.</li><li>3. You can define locators and xpath here.</li><li>4. Declare any variable/object you need to share data/status between different methods.</li><li>5. Do not modify the signature of methods declared here.</li><li>6. You can create additional supportive common methods in CommonEvents class.</li></ol>
/src/main/resources/	Config.xlsx	URL to navigate to. Already URL is defined here
	expected_data.xlsx	Contains data to fill in form
/src/main/java/coreUtilities/utls	CommonEvents.java	<ol style="list-style-type: none"><li>1. Contains all common activities.</li><li>2. Certain templated common method declared here.</li><li>3. You implement them as per your need.</li><li>4. You can add any additional method for common activity here</li></ol>
	Testng.xml	Execution needs to kick started from TestNG xml

## PROBLEM STATEMENT

Need to automate the following activities using Selenium + Java.

## Key Activities to implement:

SI No.	Summary	Action	Expected Result
1	<ul style="list-style-type: none"><li>Navigate to the URL.</li><li>Retrieve Title and URL of the current page.</li><li>Verify Title &amp; URL: Check if the title &amp; URL matches the expected title.</li></ul>	<ol style="list-style-type: none"><li>go to url : <a href="https://healthapp.yaksha.com/">https://healthapp.yaksha.com/</a></li><li>login as valid credential (<b>username : admin , password : pass123</b>) and click on "SignIn" Button</li><li>get the title and url of the Home page, post login</li><li>validate the title and url of the Home page</li></ol>	Title should be : <b>DanpheHealth</b> Url should be : <b>https://healthapp.yaksha.com/Home/Index#</b>
2	Verify that <b>OperationTheatre</b> module is present or not ? If OperationTheatre Module is present, then go to OperationTheatre Page and check whether the "Hospital Number" header text is present or not in the given table	<ol style="list-style-type: none"><li>user must be logged in</li><li>Check <b>OperationTheatre</b> module is present in left navigation</li><li>Click on the <b>OperationTheatre</b> Module</li><li>Check whether the "Hospital Number" header text is present or not in the given table ?</li></ol>	User successfully navigate to the <b>OperationTheatre</b> page and also should be read the data from the table
3	<ul style="list-style-type: none"><li>On the operation theatre modules, verify that New OT Booking button is present?</li><li>If New OT Booking button is present then clicking it popups "Booking OT Schedule   New Patient" form.</li></ul>	<ol style="list-style-type: none"><li>User must be on <b>OperationTheatre</b> page</li><li>validate "<b>New OT Booking</b>" button is present</li><li>Verify the clicking "New OT Booking" button and popup form "<b>Booking OT Schedule   New Patient</b>"</li></ol>	--> user should found the " <b>New OT Booking</b> " button, --> clicking on it and open the " <b>Booking OT Schedule   New Patient</b> " form. --> Form title /name should be " <b>Booking OT Schedule   New Patient</b> "
4	On the " <b>Booking OT Schedule   New Patient</b> " form's validate that <b>Select Patient, Diagnosis &amp; Type of Surgery</b> Textbox are present or not ? If present then fill the below textbox : <b>Select Patient textbox</b> <b>Diagnosis textbox</b> <b>Type of Surgery textbox</b> Check the data which we are entered are present in <b>Select Patient</b> textbox or not ?	<ol style="list-style-type: none"><li>User must be On the "Booking OT Schedule   New Patient" form's</li><li>Verify the Select Patient, Diagnosis &amp; Type of Surgery are present ?</li><li>If Present then Enter data in the Select Patient textbox</li><li>Enter data in the Diagnosis textbox.</li><li>Enter data in the Type of Surgery textbox.</li><li>then verify the value which is present in Select Patient textbox.</li></ol>	On the " <b>Booking OT Schedule   New Patient</b> " form's below textbox should be present: <b>Select Patient</b> <b>Diagnosis</b> <b>Type of Surgery</b> The entered data should be correctly displayed in Select Patient textbox on "Booking OT Schedule   New Patient" form.

5	On the "Booking OT Schedule   New Patient" form's validate that Remarks field is present or not ? Verify "Remarks" Text area is enable and verify the placeholder name of "Remarks" text area.	1. User must be On the "Booking OT Schedule   New Patient" form's 2. Verify the <b>Remarks</b> field is present ? 3. Verify the Remarks field is Enable 4. Then get the place holder name of "Remarks" text field 5. Verify that place holder name and print on console.	Placeholder name should be " <b>Remarks</b> " and then print on console
6	On the "Booking OT Schedule   New Patient" form's, type " <b>Dr. Pooja Mishra</b> " in surgen Name textfield and verify the Dr. pooja mishra button is present or not ?	1. type Dr. pooja Mishra in surgen textfield 2. Then click on "Remark" textfield 3. then verify that Dr. pooja mishra button is present or not.	Dr. Pooja mishra button should be appear below the Surgen Textbox
7	On the "Booking OT Schedule   New Patient" form's, click on the " <b>External?</b> " checkbox and verify the check box is selected or not ?	1. user must be "Booking OT Schedule   New Patient" form's 2. click on "external?" check box 3. verify the check box is selected	checkbox should be selected
8	On the "Add External Referral" form's, when we click on add button without filling any information, Verify the error message (Referrer Name is required)	1. On the "Booking OT Schedule   New Patient" form's , External" checkbox must be selected. 2. Click on "+" icon , it popup the "Add External Referral " form 3. click on "Add" button without filling any information its shows the Error Message. 4. then Validate that error message	Error message should be : <b>Refferer Name is required.</b>
9	On the "Booking OT Schedule   New Patient" form's, <b>External?</b> Checkbox must be selected. Click on "+" icon to popup the <b>Add External Referral</b> form then fill all the details (get the data from excel) , click on all checkbox and then click on " <b>Add</b> " button then verify the success notifications message.	1. User must be on "Booking OT Schedule   New Patient" form's and External? Checkbox must selected. 2. click on external "+" icon 3. fill all the details (get data from excel) 4. click on all check box 5. click on "Add" button 6. verify the "succes notification" message	message should be " <b>Success update</b> "
10	On the "Booking OT Schedule   New Patient" form's, Close the " <b>Booking OT Schedule   New Patient</b> " form's by using javaScript.	1. User must be on "Booking OT Schedule   New Patient" form's 2. Click on the cross / " <b>X</b> " button using javaScript	"Booking OT Schedule   New Patient" form's should be closed.

11	Expand Billing Module, Scroll to the "Handover" Sub module's and then click on "Handover" Sub module again Scroll to the button of the handover page and validate the "Remarks" text field and "Handover To User" button is present	<ol style="list-style-type: none"> <li>1. Click on the Expand icon of the "Billing" Modules</li> <li>2. Scroll to the "Handover" sub module</li> <li>3. click on the "Handover" sub module</li> <li>4 again scroll to the button of the handover page</li> <li>5. validate the "Remarks" text field and "Handover To User" button is present</li> </ol>	user should able to scroll to the "Handover" sub module and the again scroll to the bottom of page.
12	On the Billing module's , bottom of the "Handover" page , locate the "Remarks" textbox and "HandOver To User" button by using "ID" locator and verify taht, the "Remarks" textbox and "HandOver To User" button is present or not ? If the "Remarks" textbox and ""HandOver To User" button is present, then highlight those element.	<ol style="list-style-type: none"> <li>1. user must be present on the bottom of "HandOver" page of "Billing" modules</li> <li>2. locate the "Remarks" textbox and "HandOver To User" button by using "ID" locator</li> <li>3. then verify the "Remarks" textbox and "HandOver To User" button is present or not</li> <li>4. if present, then highlight those element.</li> </ol>	"Remarks" textbox and "HandOver To User" button should be present, then highlight those element

**NOTE:** "Please do not delete any file in the src folder. But you are free to add any other file".

### Expectations:

- 1) Learners should write automation script using Java and selenium to automate all the steps in the above question. In other words, automation script should perform all mentioned steps.
- 2) Learners should not use any tools to create the xpath. They should develop the xpath/cssselector on their own.

---

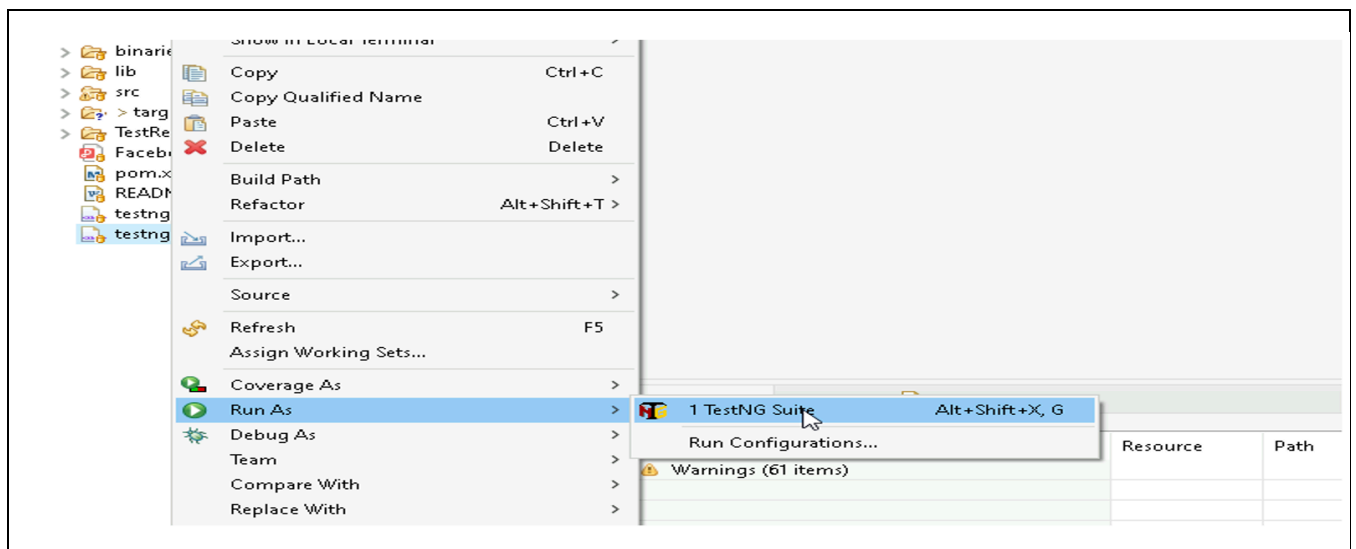

## IMPLEMENTATION/FUNCTIONAL REQUIREMENT

### 1.1 CODE QUALITY/OPTIMIZATIONS

1. Associates should have written clean code that is readable.
  2. Associates need to follow SOLID programming principles.
- 

## EXECUTION STEPS TO FOLLOW

1. You are mandatory required to run test cases for applications before final submission. Without which project evaluation will not happen.
2. You can launch test cases any time as follows: Right click on testng.xml and run TestNGSuite

3. Before final submission, you are also required to push your code to GIT. Following are the steps to follow:

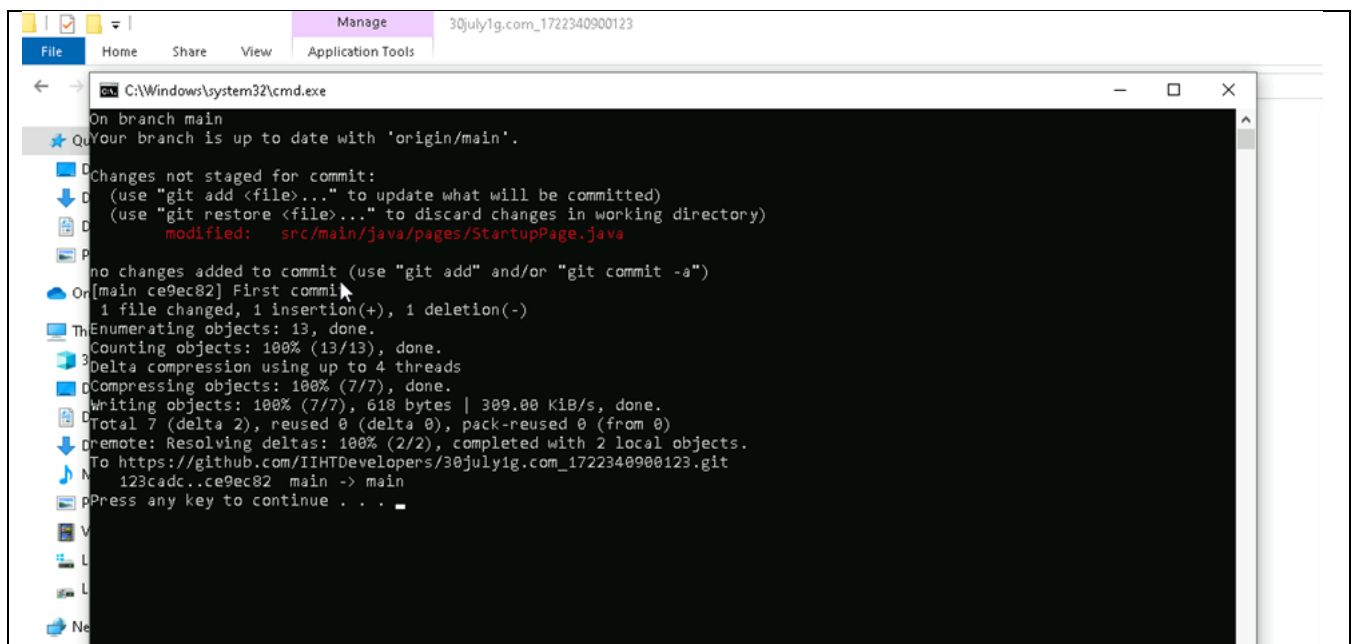

In your project folder, you will find a batch file named `git_commands`

Double-click the batch file to run it. It will run the commands to push your code to GIT.

```
On branch main
Your branch is up to date with 'origin/main'.

Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
        modified:   src/main/java/pages/StartupPage.java

no changes added to commit (use "git add" and/or "git commit -a")
